

e3 Systems appointed MTN Platinum Provider

15/02/12

Mallorca based marine electronics company e3 systems has been awarded Platinum Provider status by MTN Satellite Communications (MTN), the leading global VSAT satellite communications provider and top choice for more than 50% of the world's top 100 largest yachts. The MTN Platinum Provider status is the highest accolade awarded by MTN to their Maritime Service Providers (MSPs) and is based on a combination of achieving sales revenue and meeting their stringent requirements in terms of training installation and service personnel. e3 Systems now has 10 MTN Certified Technicians on their team ensuring that they are one of the best equipped companies after MTN itself to install and service MTN systems and equipment. "As MTN's first Maritime Service Provider, e3 has played a vital role in the success MTN has achieved in the yachting market since the first yacht was commissioned with MTN's DirectNet VSAT Service in 2004." said Derik J Wagner, Managing Director of MTN Yachts Services. Roger Horner, e3 System's Managing Director commented: "We are delighted to have achieved Platinum Status. We have worked hard with MTN over the past few years to expand their service into the super yacht market. This award recognises e3's ongoing commitment to client service in the VSAT market demonstrated by our investment in staff training for MTN, Sea Tel and all our other eVSAT services. e3 Systems is the only MTN Platinum provider with offices all around the Mediterranean Region. Horner went on to add: "We are constantly striving to ensure the services we offer match the needs of our clients".

About e3 Systems

As a leading Communications Integrator in the yacht market e3's mission is to redefine the way communication services are sold and provided to yachts. e3's diverse portfolio of communication services includes VSAT, Inmarsat, Iridium, 3G and WiFi, thus enabling them to offer the service, or combination of services, which is best suited to the needs of the vessel.

e3's communication services include as standard their bandwidth management system using the eDSC which enables the simultaneous control and monitoring of the data communications on board using an iPad, PC or Mac.

About MTN Satellite Communications

MTN Satellite Communications (MTN), the first company to offer a stabilized Very Small Aperture Terminal (VSAT) satellite solution for ships at sea, has contributed to the evolution of the satellite industry over the past three decades, delivering communications solutions that address the needs of people moving around the world. Through MTN's reliable global satellite network and expertise, the company continues to deliver solutions across various markets while addressing the unique challenges and needs for each. Today, MTN offers services and solutions to cruise lines, commercial shipping, oil and gas, mega yachts, government entities and aviation markets.

With sales and service offices, teleport gateways, Points of Presence (PoPs) and spare parts depots located in all corners of the globe, MTN's global footprint allows them to successfully serve more than 600 vessels sailing around the world and to U.S. government and commercial aircraft on transatlantic routes. In addition to bandwidth management, MTN delivers and supports a broad array of integrated turnkey services, including remote access for Internet, VoIP, voice services, remote IT management, global vessel tracking, bandwidth optimization, real-time video capabilities, crew calling solutions, and other enterprise solutions.
